

Sample Project Report

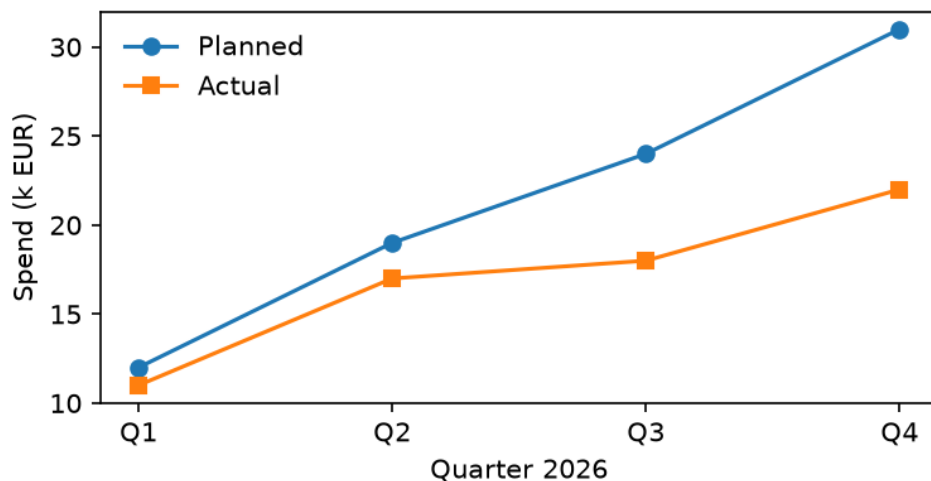

Work package 3 — quarterly summary

This is a synthetic document used as the runnable example for the pdf-extract skill. It contains ordinary body text, a table that a text extractor can parse on its own, and a vector chart that it cannot. Running the skill over it should extract all the text, skip the table (already handled), and send exactly one image to a vision pass.

Budget by category

Category	Planned	Actual
Personnel	48,000	45,200
Equipment	22,000	24,800
Travel	6,000	3,100
Total	76,000	73,100

Figure 1: spend against plan

Actual spend tracked plan closely through Q2 but diverged in Q3 as equipment procurement slipped. The variance is expected to close in Q1 of the following year.
